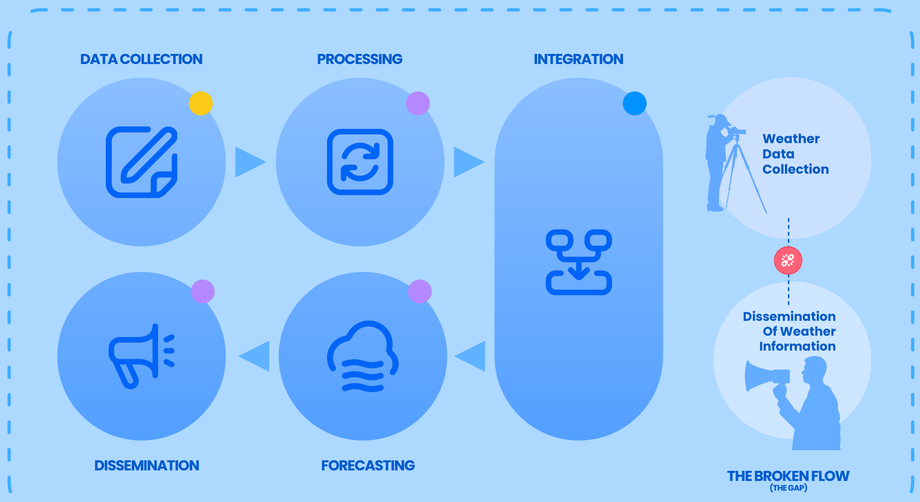
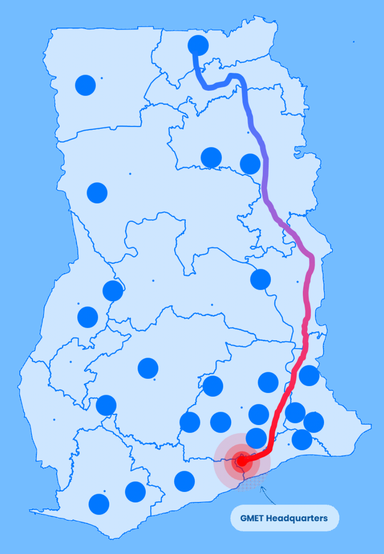
THE **PROBLEM**

Weather data is **collected**. But does it reach the people who need it in time **to act?**

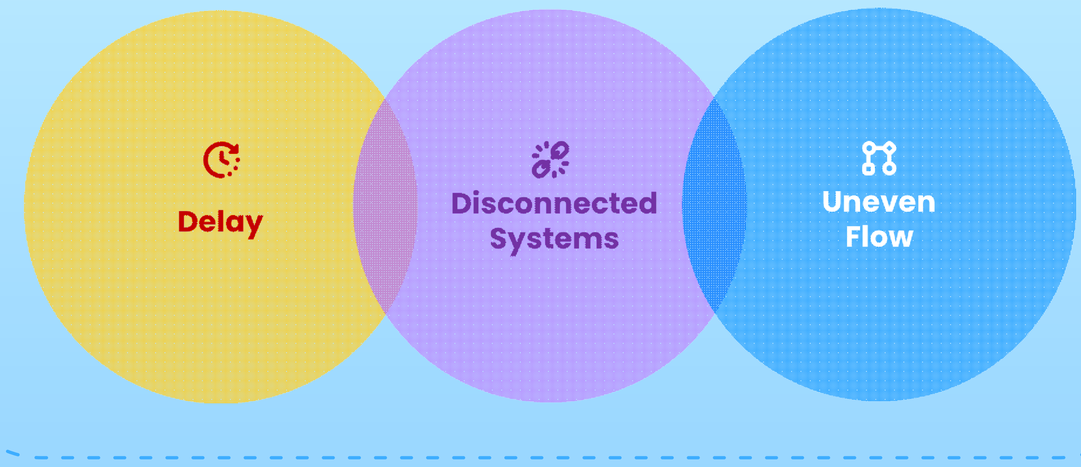




Data travels up to **800km** across the country only to reach **HQ weeks later**

- Distances from HQ **Up to 800km**
- Physical Transport **Vehicular**
- Delayed Arrival **Up to 1 Month**

THE **PROBLEM IN THREE LAYERS**



WHY **IT MATTERS**

THE **STAKEHOLDERS**

RURAL FARMERS

FISHERMEN

GENERAL PUBLIC

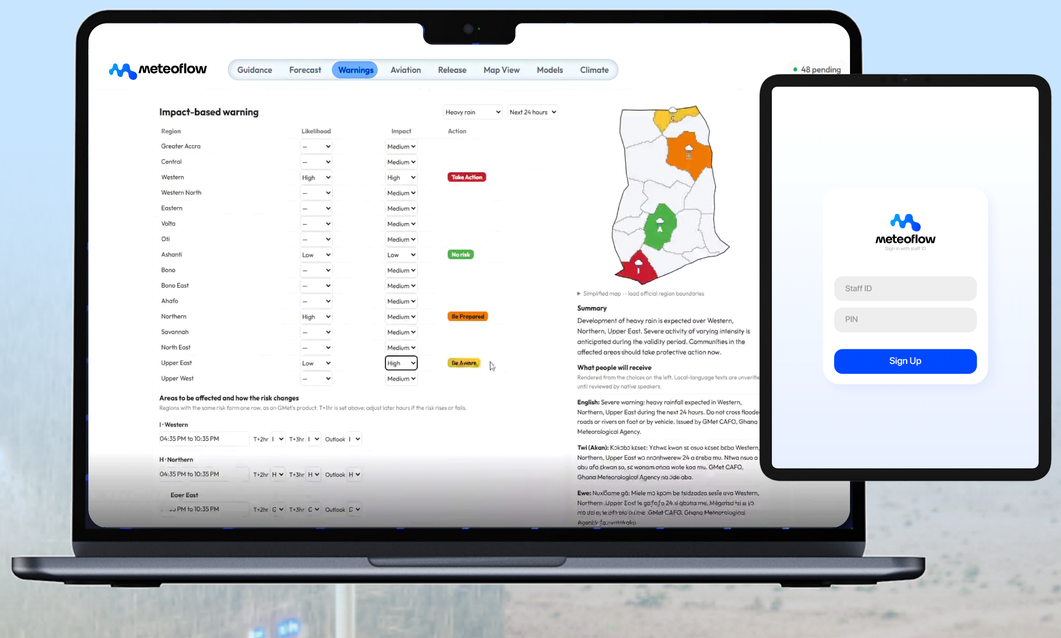
AVIATION

DISASTER MANAGERS

RESEARCH & INSTITUTIONS

THE **SOLUTION**

meteoflow



Meteoflow is a **unified, offline-first platform** connecting observation, forecasting and dissemination while **working with GMet's existing systems.**

KEY **FEATURES**

- **Same-day, end to end**
- **Forecaster-in-the-Loop AI:**
- **Offline-first by design**
- **Built on GMet's tools**
- **One data core, many outputs**
- **Inclusive and open**

13 CLIMATE ACTION

11 SUSTAINABLE CITIES AND COMMUNITIES

2 ZERO HUNGER

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

BUSINESS **MODEL**

45% Platform and AI development

- Signed-reading app
- HQ review and QC
- AI form scanning

USD **$18,000**

25% Training and operations

- Observer training
- HQ and district support

USD **$10,000**

15% Stations and tablets

- About 40 tablets
- Assumed US$150 each
- Spares

USD **$6,000**

15% Partners and languages

- Partner outreach
- Twi, Ga, Ewe wording
- Native-speaker review

USD **$6,000**

"Weather information is only valuable when it **reaches people in time to act.**"
